PRISMATRONIC

TOMORROW'S COMMUNICATION WILL BE DIGITAL!

From the very outset, 30 years ago, we have continued to focus on our commitment to our clients and the quality of our products.

Prismaflex International has become a market leader in the design and manufacture of traditional and digital advertising supports and wide format digital printing solutions. This twofold expertise is also available worldwide through our 10 international subsidiaries covering each continent.

Innovation, commitment and a real sense of responsibility best describe the mindset of our company that anticipated the digital revolution for the outdoor advertising market.

Prismaflex International quickly made a name for itself on the OOH advertising market and is the only French company to have its own LED module production units, in Shenzhen, China, and in Boulder, Colorado, USA.

As the designer, manufacturer and expert in the integration of LED screens in innovative displays the Group has become a preferred partner for professionals of the advertising world and the mass retail sector. We also offer high-end and creative technical assistance and support for all new digital communication projects.

Everything digital has rewritten the codes for OOH communication, expectations have evolved and digital signage has become part and parcel of the OOH advertising landscape.

« Inventing and imagining communication trends for tomorrow! »

DIGITAL OUT-OF-HOME ADVERTISING: FROM MASS MEDIA TO PERFORMANCE MEDIA.

DOOH advertising is the ultimate solution and has been growing significantly for a number of years.

Today, it represents already 9% OOH advertising in France, and also 39% in the United Kingdom, 24% in the USA and 15% in Germany.

\$16 BILLION

+50%

15.5%

40 000

worldwide advertising revenue in 2018 for DOOH (Global Digital Out-of-Home Media Forecast 2014-18 of PQ Media)

of OOH advertising investments in the EU concern digital solutions.

Dynamic display growth in 2017 in terms of advertising revenue in France according to an IREP survey

Screens in France. The nationwide coverage is intensifying fast.

PEOPLE LIKE DOOH ADVERTISING

DOOH can be broken down into two categories:

- Traffic DOOH (train stations, subways, car parks, streets...) that targets a mobile audience.
- Wait-marketing DOOH that targets a more static audience (airport lounges, medical centres, pharmacies, taxi ranks...)

Digital advertising is much appreciated by consumers who claim (85% of those questioned) it arouses curiosity and reduces any impression of waiting. They also believe this eye-catching media improves brand image. Average recall is 83%, largely due to message repetition, a key success factor for digital advertising.

The advantage of digital advertising solutions is format and positioning flexibility, whether indoor or outdoor.

7 KEYS POINTS FOR A SUCCESSFUL DIGITAL PROJECT

WITH OVER 30 YEARS' EXPERIENCE OUR
DIGITAL EXPERTS CAN HELP YOU CHOOSE
THE LED SOLUTION YOU NEED.

NORMS AND CERTIFICATIONS

PRISMATRONIC COMPLIES WITH WORLDWIDE RECOGNISED CERTIFICATIONS

Respect for the environment has been a priority for Prismaflex International for a number of years.

We adhere to standards imposed by different countries for all advertising displays.

Our Prismatronic displays are therefore guaranteed to meet all applicable standards and regulations.

Prismaflex International can provide you with an LCA (Life Cycle Analysis) for all our PRISMATRONIC LED products.

Prismaflex printing department was awarded the ISO 14001 accreditation in 2011.

EMC Certification at cabinet level

EMC Certification for the full-sign in real outdoor operating conditions

FOCUS ON ELECTROMAGNETIC COMPATIBILITY (EMC)

EMC: THE EU DIRECTIVE ON ELECTROMAGNETIC COMPATIBILITY

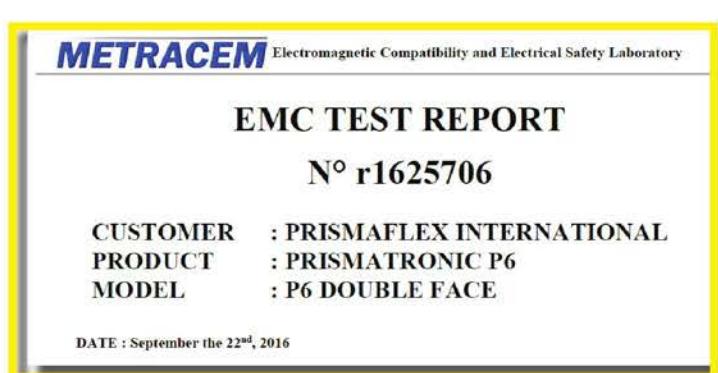

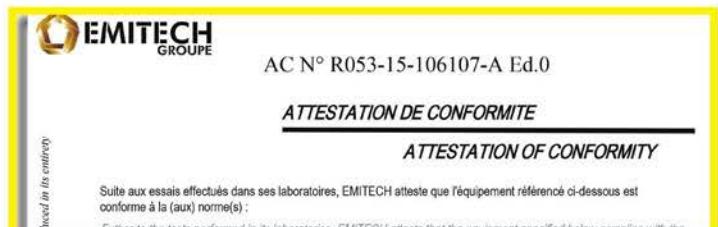

Prismaflex fully respects the EMC business conduct guidelines for electromagnetic environmental guidelines.

Prismaflex LED screens are designed and manufactured in accordance with current international standards.

For instance, Electromagnetic Compatibility (EMC) certification is based on the application of clearly defined standards.

In line with these standards, all our Prismatronic displays operate in their own electromagnetic environment without introducing unacceptable electromagnetic disturbances to other equipment in the same vicinity.

The signs are tested at cabinet level and also for the full-sign in real outdoor operating conditions.

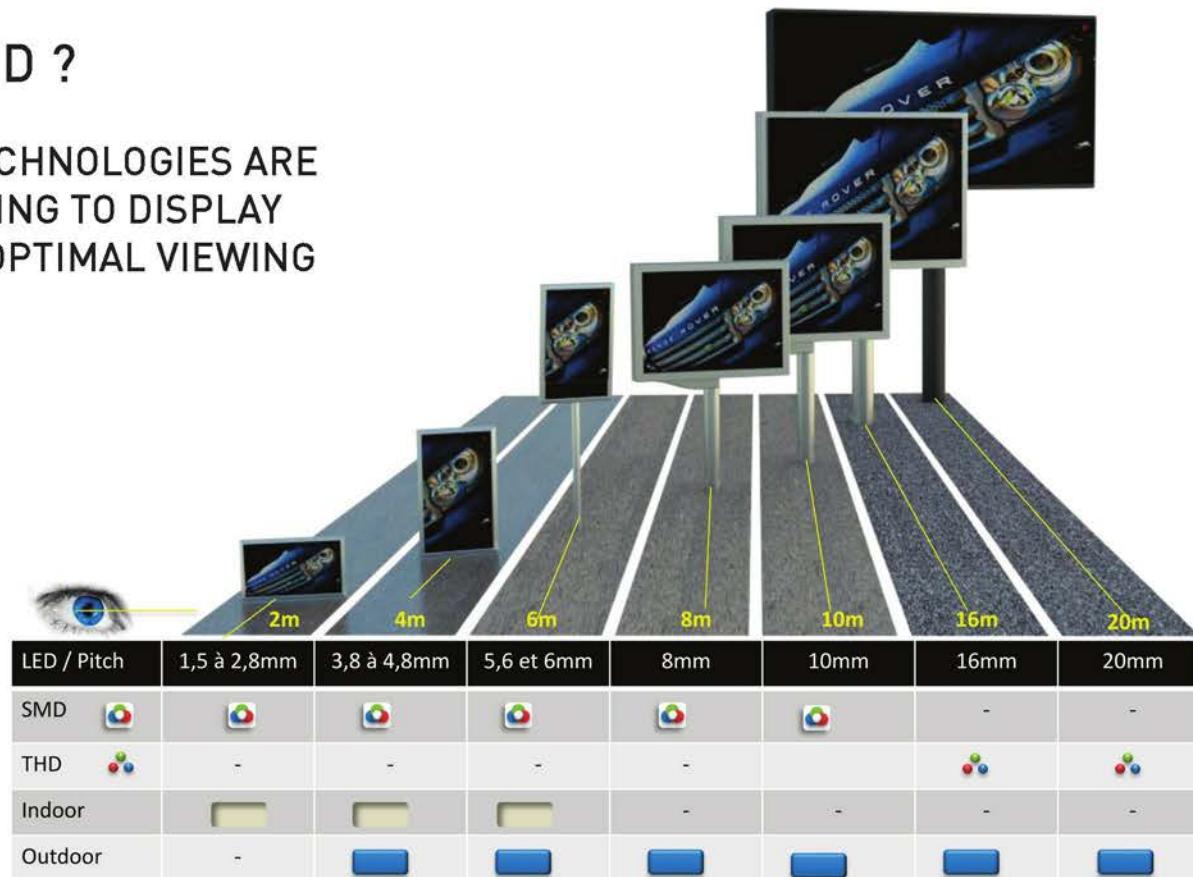

EMC certification issued by leading European laboratories, EMITECH and METRACEM

SMD OR THD ?

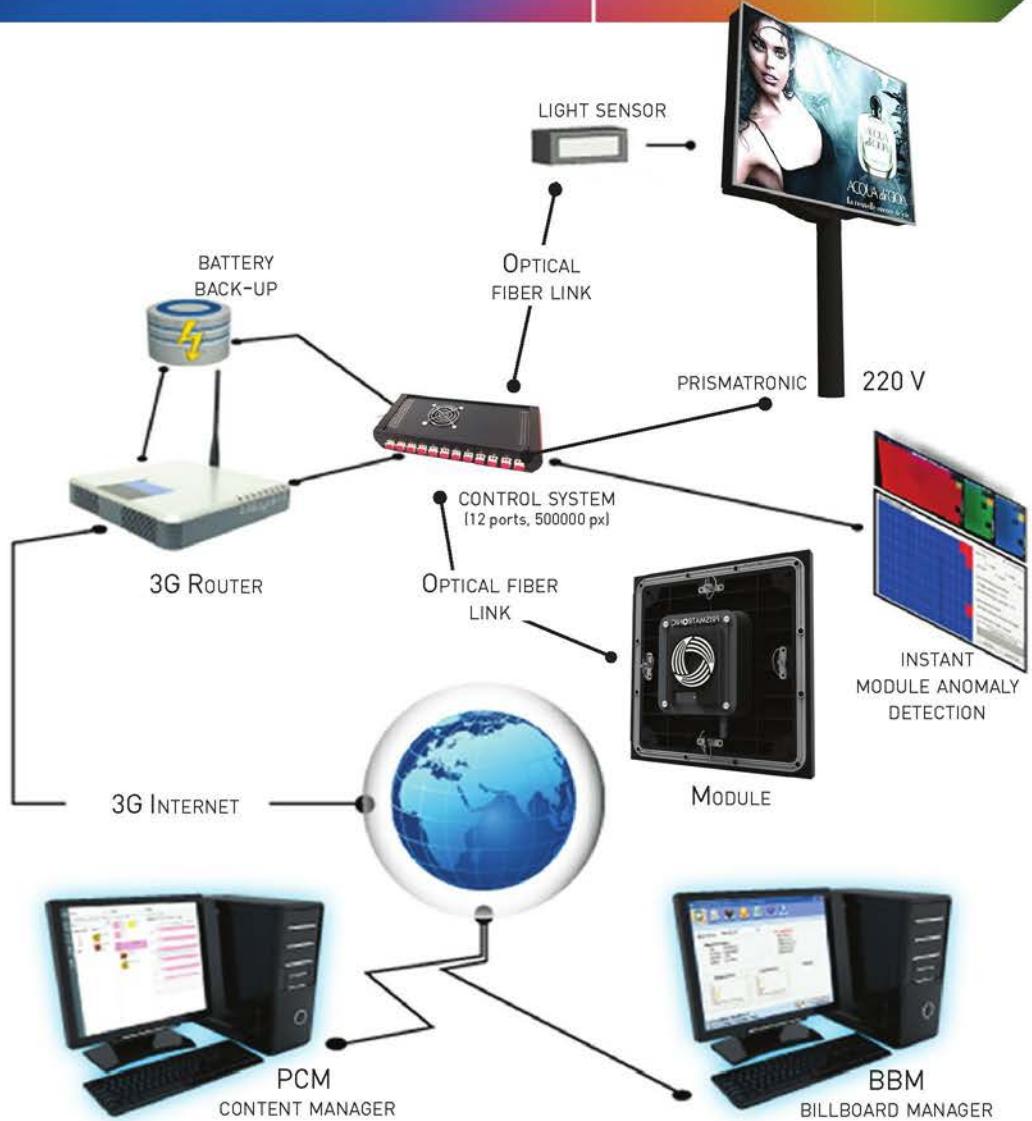

SMD & THD TECHNOLOGIES ARE USED ACCORDING TO DISPLAY FORMAT AND OPTIMAL VIEWING DISTANCE.

Two LED technologies are available:

- SMD (Single Mounted Device) = the three light sources, red, green and blue are assembled in the same unit that is welded to the front of the printed circuit thereby improving LED power. The most advanced technology on the market today.
- With THD technology (Through Hole Devices) the 3 light sources (red, green, blue) are assembled side by side in separate units.

FOCUS ON BBM: PRISMATRONIC BILLBOARD MANAGER

BBM CONTROL SOFTWARE

- Improved monitoring accuracy.
- Remote failure detection at module level.
- Online control.
- Graphic interface displaying measured results of screen health.

A focus on sustainability

- Ultra low power consumption.
- Life Cycle Environmental Assessment.
- Ambient & night light sensor redundancy.
- Divided data / power shielded cabling.
- EMC certified.
- Fibre optic data transmission.

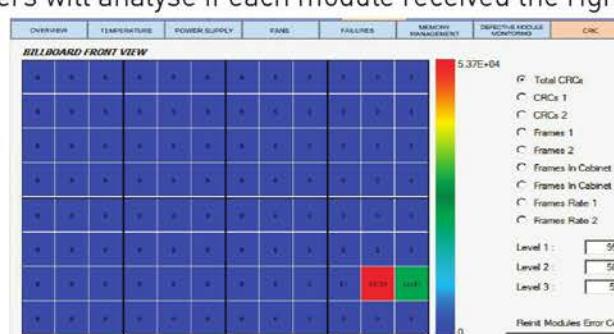

A lifetime of outstanding quality

- Lifetime of sustained color uniformity.
- Lifetime of sustained brightness.
- Highest quality certified components.
- Factory calibration and onsite recalibration capabilities at module level.
- Module level RGB color channel aging regulator.
- Extreme stress tests (high pressure water, extreme heat, extreme cold, vibration, UV).
- Signal and power redundancy..

DATA COMMUNICATION MONITORING:
CRC AND FRAME COUNTERS.

- Each individual module is equipped with communication data analysis feature
- CRC and frames counters are used for diagnosis purpose, as an accurate investigation tool on data communication to check if the data are running properly between modules and between the PC and the modules.
- CRC will analyse if the data received by each modules are correct or not.
- Frame counters will analyse if each module received the right quantity of data.

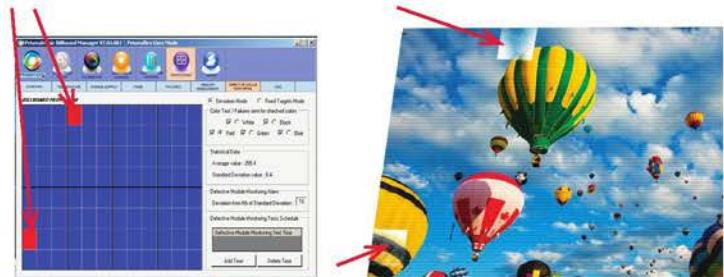

EXCLUSIVE DEFECTIVE MODULES ANALYSIS

BBM gives the user the flexibility to decide if the software should send alarms in the case of defective module detection. The software can also allow the user to decide how the alarms should be sent.

BBM can show the measurement results in graphic form, making it easier for the user to locate the position of the defective modules.

BBM can give the analysed result in WHITE, RED, GREEN, BLUE & BLACK.

(The colour red represents the defective modules)

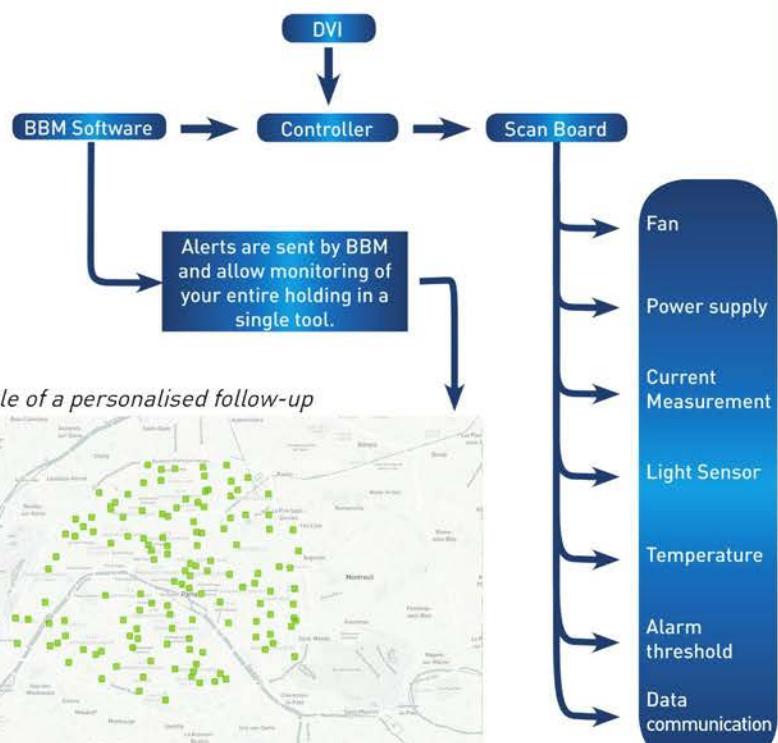

24/7 Monitoring & diagnostics

- Real time display operating status (system performance & content display).
- 24/7 monitoring with instant alerts.
- Geo mapping, event tracking and asset life history through secured portal.
- Direct M2M real time data transmission.

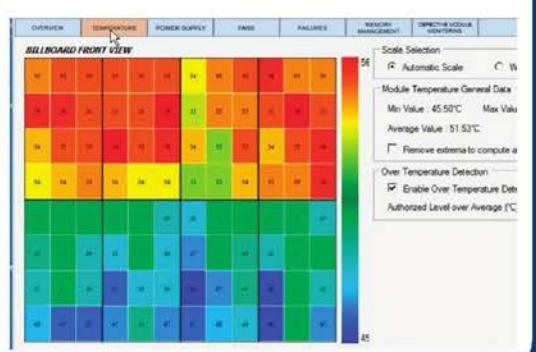

ASSET TRACKER

TEMPERATURE MONITORING AT MODULE LEVEL

- Each individual module is equipped with a temperature sensor
- Temperatures at module level are reported to BBM server and are remotely accessed.

PRISMATRONIC

PRISMAFLEX
EXPERTISE

PrismatronicChina: 4,000 m² devoted to the production of modules in Shenzhen, the Chinese hi-tech capital.

PRISMAFLEX CONTROLS THE FULL SMD PRODUCTION PROCESS THANKS TO ITS AUTOMATED CHINA-BASED FACTORY!

Two production lines equipped with the latest state-of-the-art technology:

- Middle speed SMT line.
- High-speed SMT line.

Fully automated Module line, frame mounting, silicon potting and shader mounting.

Large and flexible volume production capacity: 25,000m² / year or 2,000m² / month.

Extremely high production rates.

Strict quality control performed by Prismaflex:

- Visual quality control.
- Inline soldering control.
- RoHs compliant soldering.

Prismaflex is the only European manufacturer of LED billboards to have its own China-based production site. Guaranteeing controlled quality and traceability.

- Cabinet integrated camera arm connection - mount & aim before you lift

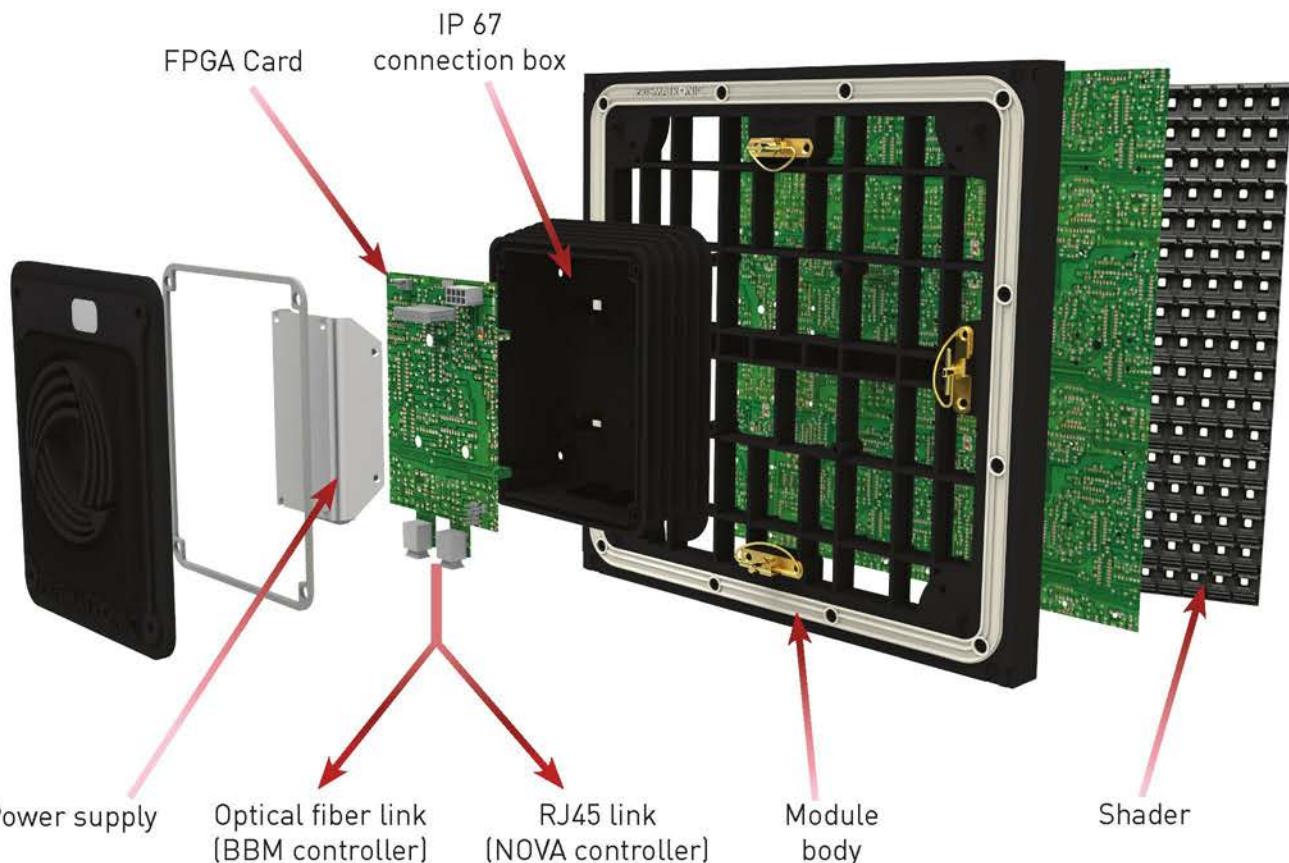

C14 CABINET :

«SEALED MODULE» + MODULAR STRUCTURE

- **Complete service:** in-house testing, IP rating, aging and calibration, after sales service and technical support all available at our headquarters in France.
- **Outstanding value for money** thanks to its aluminium extrusion (Made in France).
- **Easy Maintenance:**
 - Access from the rear (free-standing versions) with a printed or blank mesh zipped to the back of the sign.
 - Access from the front for wall-units.
- **Efficient airflow management** thanks to the fans integrated in the cabinet. A smart heat management system together with the low power consumption means that no fans or filters are required in the P16 and P20 Prismatronic units.
- **Perfect finish:** optional sliding rear doors (free-standing units).

« SEALED MODULE » : 400X400 MM

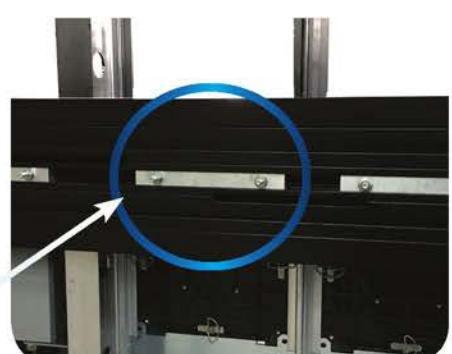

- **IP 67 connection box** where the FPGA card is located along with an integrated power supply, one data and one power cable.
- **Silicone potted** front and thermal conductive resin back for effective heat dissipation and damp proofing.
- Controller connection is via an **optical fiber**.
- Plastic UV resistant protective cover.
- Ultra-efficient **low consumption**.

MODULAR STRUCTURE

Modularity: Cabinets can be assembled either vertically or horizontally.

Thanks to its modular structure, the C14 fits all existing billboard formats.

Perfect fit!
Connecting piece
to join cabinets
togethers.

DIE CAST CABINET: DESIGNED TO EASILY IMPROVE YOUR COMMUNICATION!

AN ULTRA-HIGH RESOLUTION THAT OFFERS UNPARALLELED IMAGE QUALITY FOR YOUR
INDOOR CAMPAIGNS: SHOPPING MALLS, AIRPORTS, TRAIN STATIONS

- **High resolution:** Indoor Prismatronic displays are available from a 1.5 mm to a 5.6 mm pitch.
- **Modularity:** the new Die-Cast cabinets are easy to assemble and fully interlockable allowing you to create the size of unit that you require.
- **Easy maintenance** with front and rear service access.
- **High quality:** state-of-the-art, in-house production is achieved by using the industry's finest components and equipment for premium quality LED screens.
- **Tough and lightweight** moulded Die Cast structure.
- **Aesthetically pleasing:** the moulded aluminium structure perfectly aligns the modules so there are no visible joins.
- **Ultra-flat screen.**
- **Adapted to your needs:** our Die Casts can be used with our hanging, wall-mounted or free-standing Prismatronic Indoor LED displays.

NEW

DIGITAL BANNER : HIGH DEFINITION, PLACE WHERE YOU PLEASE LED DISPLAY

1 m² single-sided free-standing, framed or hanging LED screen with a 2.5 pitch for indoor use.

- Simple yet eye-catching communication.
- Compact and lightweight (just 32 kg) making it easy to move around. The foldaway stand means you can place it almost anywhere.
- Its brightness (1,500 nits) is three times greater than an LED screen while the power consumption remains low (200 W / m²).

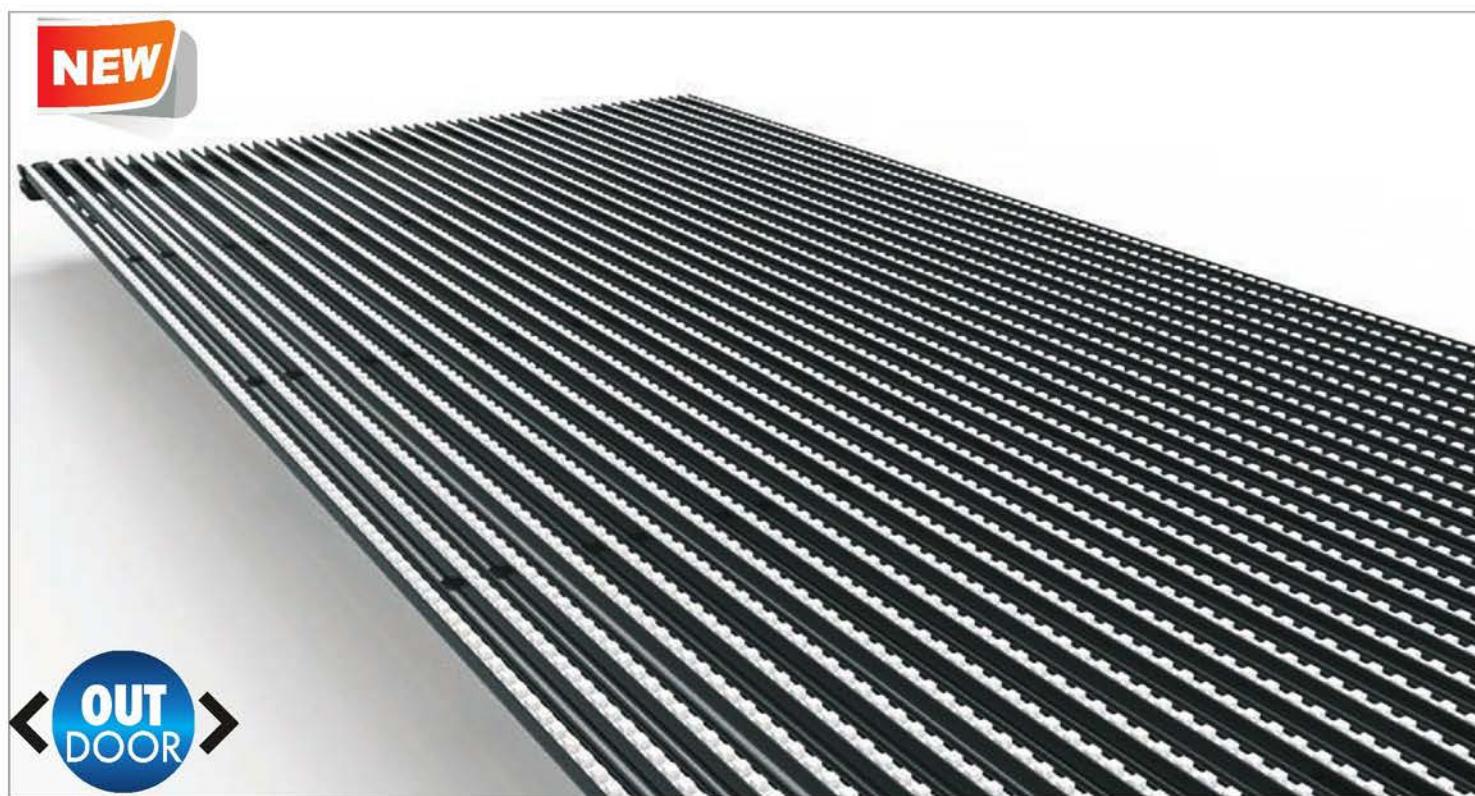

The screen can be controlled using a PC or tablet and a Wi-Fi connection, USB memory stick or HDMI cable. Content management has never been simpler:

- With a USB memory stick plugged directly into the Digital Banner itself.
- With an HDMI cable connecting the Digital Banner to your PC or tablet.
- With a Wi-Fi connection for the remote transfer of data from your PC, tablet or smartphone to your Digital Banner.

The optional Vacuum device makes maintenance operations from the front really easy.

FACADE MEDIA RANGE

P16 or P20 LED screen for outdoor use.

- The exclusive lightweight aluminium structure means the screen can be adapted to fit all 'monumental' outdoor communication. Ideal for full-covering projects and light festivals.
- Ventilated structure and high level of brightness.
- Super slim, the screen is 30 to 60% lighter than a normal screen, reducing shipping and installation costs.
- Quick and easy to install: just 10 seconds needed with the right tools to remove or add a cabinet.
- Transparency rate for P16 version: 43

	P16	P20

INDOOR RANGE

PRISMATRONIC

INDOOR
RANGE

INDOOR RANGE

Description :

LED screens with SMD technology and Die-cast structure, from 1.5 mm to 6.25 mm pitch.

The indoor range of displays can be used as wall units, hanging units or single or double-sided free-standing displays.

Indoor Prismatronic displays can be tailored to your needs thanks to the two existing sizes of the Die-Cast module:

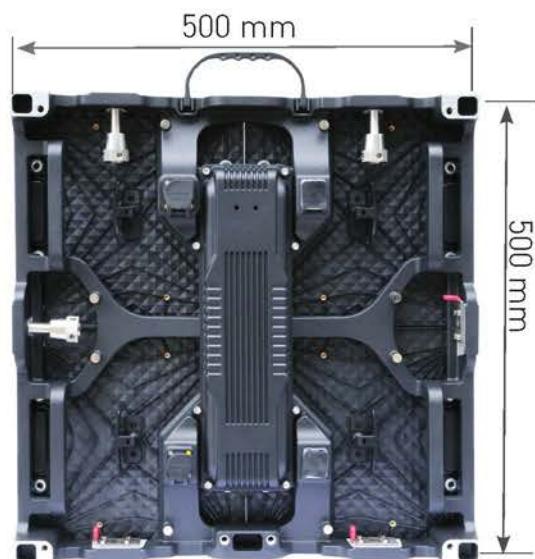

- 500 x 500 mm,
- 608 x 342 mm.

A Prismatronic display that is as discreet as it is eye-catching.

Applications and advantages :

- Designed for indoor communication.
- Ideal for railway stations, airports and shop windows.
- Tough and lightweight moulded Die Cast structure: slimmer, lightweight and more discreet display.
- Top-quality contrast ratio.
- Outstanding resolution.
- A High Brightness (HB) version is equally available for already well-lit areas.

SMD RANGE

SMD RANGE

Description :

4 mm to 10 mm pitch screens with SMD technology.

The SMD technology is the very latest in technologies. The three basic colours (red, green, blue) are grouped and controlled via the same unit.

The SMD range screens can be fitted to our TRIGA, PARIS, OSLO, COOLA, IDDA, Round Pole and wall-unit designs whether single or double-sided according to format.

A Prismatronic display tailored to your needs.

Applications and advantages:

- Recommended for 2 to 8 m² outdoor displays.
- SMD technology offers excellent contrast, an optimal light distribution and greater viewing angles.
- Outstanding resolution, from P4 to P10.
- Weather resistant, even in extreme conditions.
- Sealed module available for BBM and NOVA.

THD RANGE

PRISMATRONIC

THD RANGE

Description :

16 mm and 20 mm pitch screens with THD technology.

With THD technology (Through Hole Devices) the three light sources (red, green, blue) are assembled side by side in separate units.

The screens can be adapted to fit single or double-sided COOLA, IDDA, Round Pole and even our monumental signs.

A framed wall version is also available.

Applications and advantages:

- Ideal for outdoor signage.
- THD technology offers excellent levels of brightness and energy performance ratings and is the preferred solution for extra large format displays (over 10 m²).
- Excellent level of brightness and energy performance rating.
- Weather resistant, even in extreme conditions.
- Sealed module with Anthem Displays controller.

ADDITIONAL
SERVICES

A PCM workshop at our headquarters in Lyon, France

PCM WORKSHOPS & BBM TRAINING

YOU ARE NOT ALONE, WE ARE ALWAYS ON-HAND TO PROVIDE SOFTWARE TRAINING AND TECHNICAL SUPPORT.

Producing an industry-leading product is not enough. Back-up services are key to ensuring the best return on your investment and product satisfaction. Training sessions and workshops are organised to help you get the most out of the system.

PCM Workshops:

Prismaflex offers PCM workshops which will enable you to experience and understand just how easy the software is to use and to optimise your content management.

Thanks to our secure and user-friendly web interface, you will be able to:

- Create and control playlists
- Manage scheduling and broadcasting according to access rights
- Enable clients to manage user rights
- Obtain playback reports in order to check playlists (play times, dates, duration...).

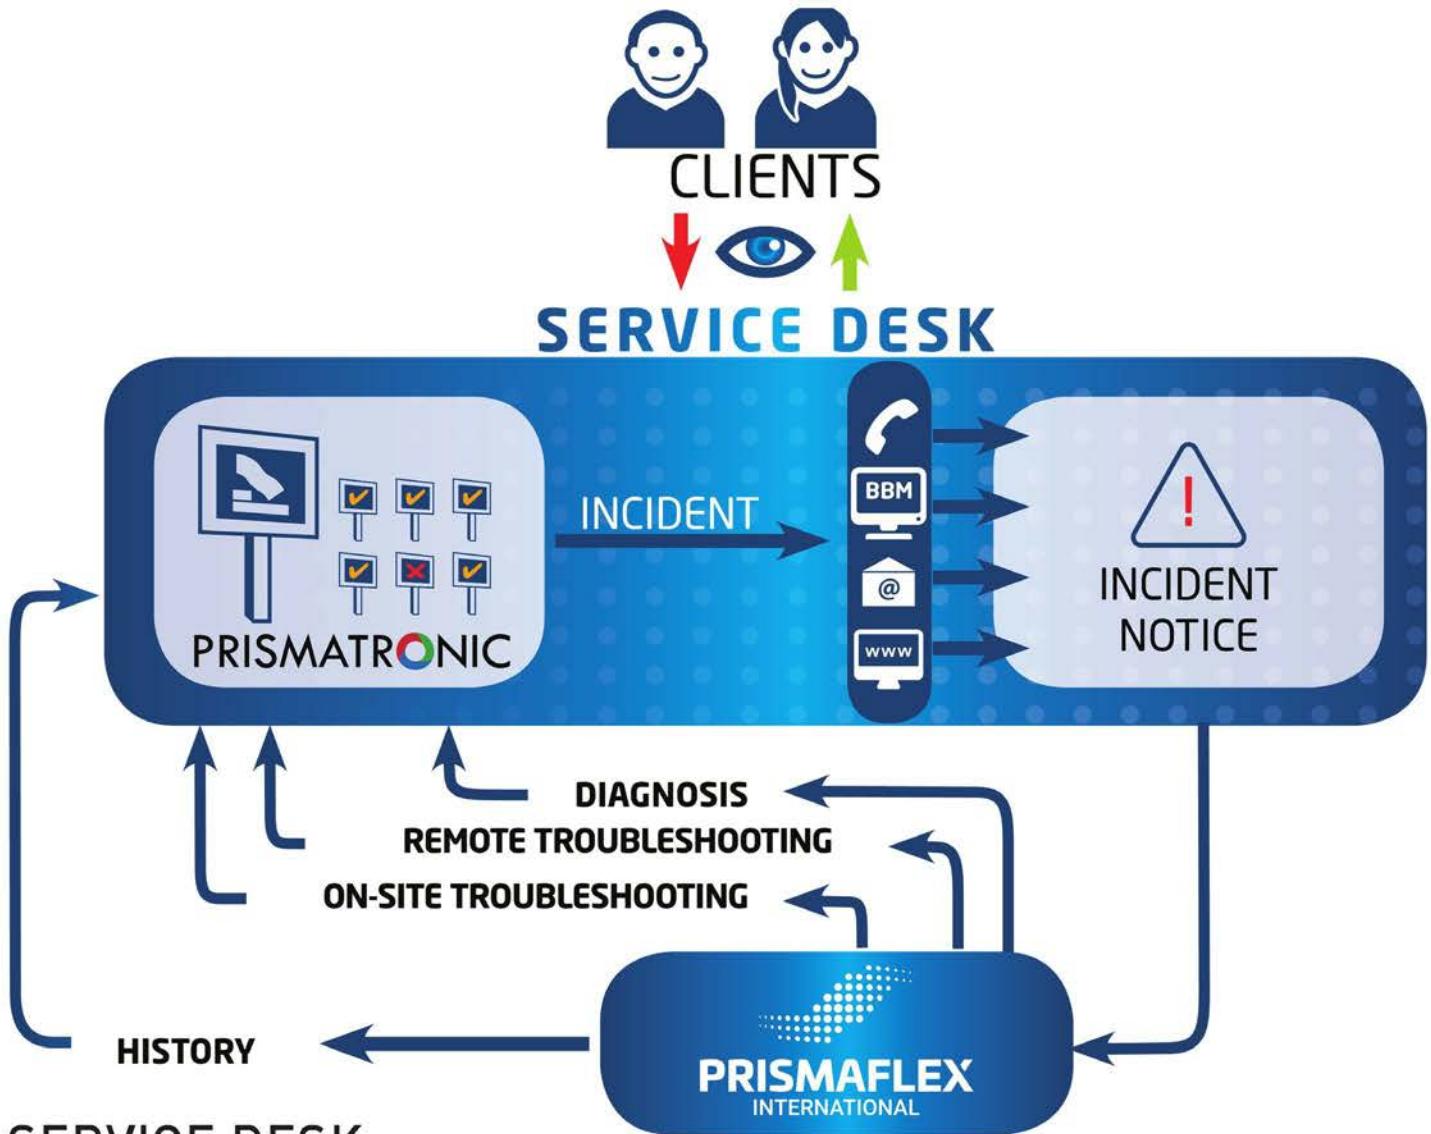

The PCM is hosted on the secure Prismaflex network.

BBM Training:

Prismaflex provides BBM training so that you can manage your state-of-the-art software and gain an in-depth knowledge of its capabilities.

BBM customer training

SERVICE DESK

A GLOBAL ON & OFF-LINE PLATFORM TO SHOWCASE THE EFFICIENCY OF ALL YOUR DIGITAL DISPLAYS.

Our Service Desk provides user-safe optimization operations of your Prismatronic LED screens with:

- Screen diagnosis
- Live content management control
- Client request management
- Improved operations
- Reliability assessment.

The data collected from the display through the BBM control centre is forwarded in real time and displayed within the Service Desk. When a sensor detects a device performing below its functional value, it generates an alert.

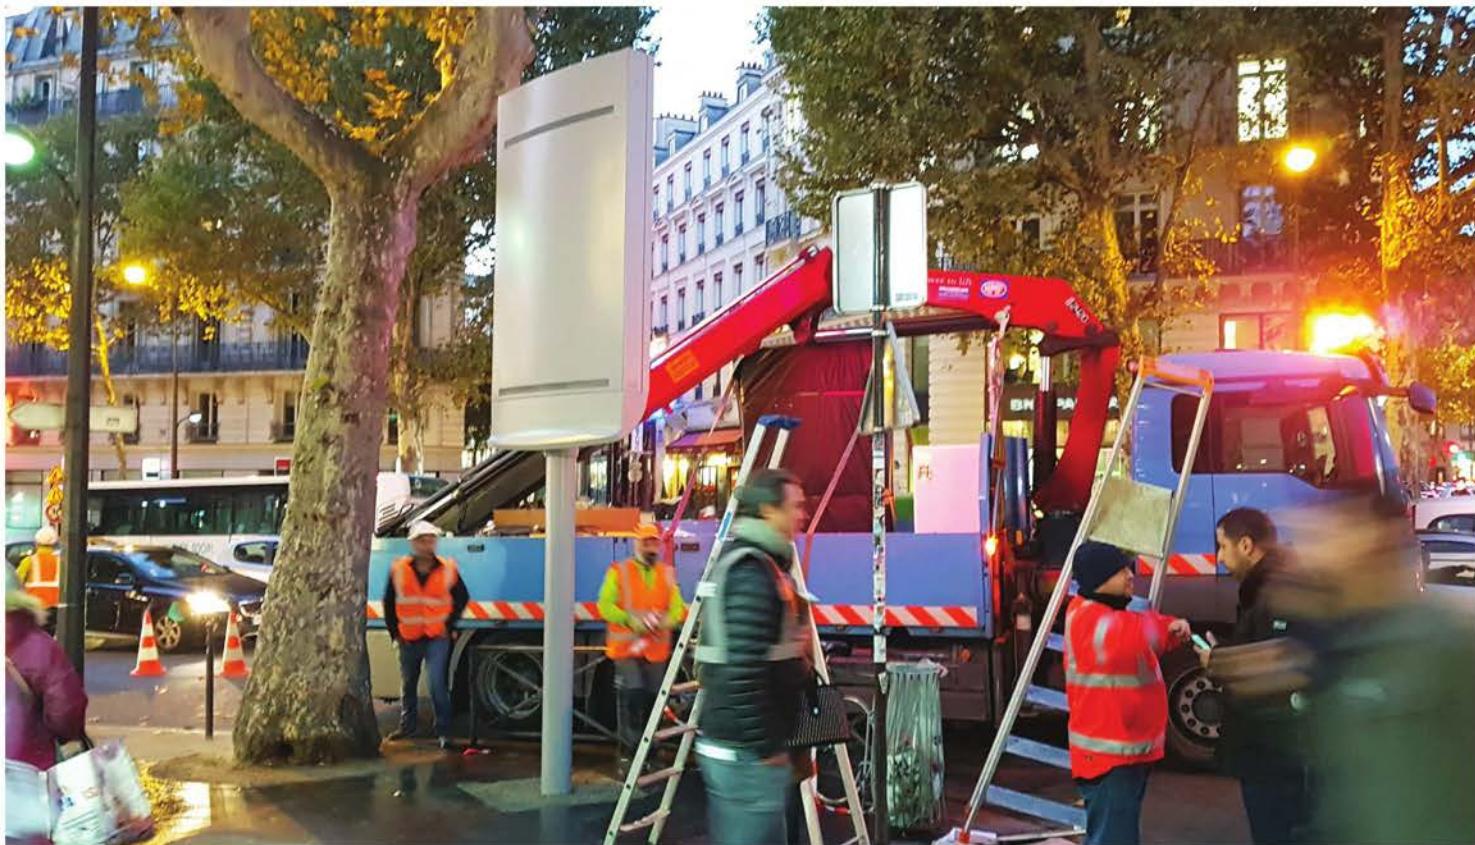

Request management

Whether to report an incident, request a change or simply ask a question, our Service Desk is on-line to help you. A notice is automatically opened then closed once the request has been dealt with.

Action taken and time to solve it is logged in the database for the future reference and analysis. Asset monitoring

history and incidents management are stored in the database in order to give you in-depth analysis of your digital screens.

Customized dashboards are generated to quickly report specific areas of interest. All data gathered by the Service Desk can be accessed via a mobile device such as a tablet or smartphone.

WARRANTY & SERVICING

BOTH THE WARRANTY AND SERVICING CONTRACT ENSURE THE LASTING QUALITY AND DURABILITY OF YOUR EQUIPMENT.

Warranty:

All our Prismatronic signs have a 3-year parts warranty (control center 1 year warranty).

A warranty extension is available upon request.

Servicing contract (upon request):

Our servicing contract may include:

- A hotline.
- Preventive maintenance : once a year.
- Remote diagnosis.
- On-site intervention in some countries.

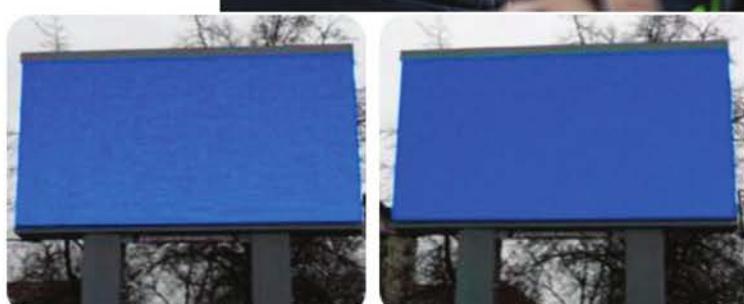

Additional services for screens fitted with our BBM system.

Included:

- Remote sign monitoring.
- BBM software updates.
- Remote maintenance operations.

Optional:

- On-site screen recalibration (upon request).

FINANCING

BECAUSE FINANCING IS IMPORTANT: OUR SOLUTIONS ARE FLEXIBLE!

Benefits of Financing:

- Get an immediate return on your investment.
- Preserve your credit line availability.
- Upgrade your screens as technologies evolve, even before the end of your contract.
- Invest while safeguarding your equity.
- A leasing solution for a healthy looking balance sheet.

PLACING THEIR TRUST IN US WORLDWIDE.
